

Members who use natural gas in their production process, such as manufacturers and restaurants, may see significant supply and tax savings from our member benefit, the **Chamber Energy Program**.

A pizza shop recently emailed their utility bills to the program for a free analysis and ended up reducing their total electric and gas costs by over **\$15,000 annually**. The program was also able to help them identify and file for a **50% sales tax exemption** on their natural gas, saving an estimated additional \$1,500 annually.

Call **330-208-2082** or email your utility bills to chamberenergy@ceateam.com today.
